

Powering e-Commerce Globally

GLOBAL ACQUIRING PLATFORM (GAP)

TAKE ADVANTAGE OF INCREASED SALES BY ACCEPTING PAYMENTS IN LOCAL CURRENCIES

Merchant e-Solutions bridges the GAP in global payment processing services with an extensive range of payment methods enabling new customers to shop more often in familiar currencies.

ONE EASY INTERFACE DOES IT ALL...

Customers Shop in their Currency

The Global Acquiring Platform (GAP) from Merchant e-Solutions provides e-commerce merchants with worldwide customers the ability to transact payments with one connection into the MeS processing platform. With the MeS "single source" option for global payment acceptance and reconciliation, ecommerce merchants can offer a vast number of payment methods in 150 currencies with pricing in the currency that their customer uses and trusts everyday. Only one interface to the MeS international solution (GAP), gives merchants the ability to sell goods and services anywhere in the world and provide global payment methods that are easy to implement, secure and processed in familiar currencies.

Merchants Settle in their Currency

In addition to expanding a global reach for improved sales, GAP opens the door for merchants to authorize and settle transactions in their currency choice. E-commerce customers shopping on-line can make payments in local currency – based on where the consumer is connected to the Internet, while merchants can view the same transactions in a currency they prefer.

How GAP Works – "Best in Industry" Reporting for all Currency Types

Using the Internet to deliver innovative and proprietary technology, Merchant e-Solutions meets the needs of U.S. based merchants that are transacting globally. All payments and card types are aggregated into superior web-based reporting for all currency types with real time access to 5+ years of history.

Powering e-Commerce Globally

GLOBAL ACQUIRING PLATFORM (GAP)

Merchant e-Solutions leads the way for multi-currency payment processing with the newest and most comprehensive e-commerce payment solution available within the industry today.

GAP – ONE EASY INTERFACE DOES IT ALL

Key Benefits
